Experian Verify™ Preview Report

Provides an early signal from Experian Verify VOE data showing whether an employment record exists within the last two years plus year to date. Displays employer name to give immediate direction on whether to proceed with verification.

The Work Number® Report Indicator & IQ Report by Equifax

The IQ Report surfaces employer name, employee tenure, and prior year income VOI data. Lookback aligns to the customer's VOE/I configuration, most commonly 36 months, helping teams quickly assess whether records reflect a current employer.

Peek Verify™ by Thomas & Company

Indicates whether a Thomas & Company employment record exists, showing employer name and active or inactive status. Uses a 36 month lookback to help teams validate coverage before ordering and avoid unnecessary verifications.
