

Income CalculationX

Complex income. Analyzed in minutes. Automated for the full loan lifecycle.

How Does it Work?

Income CalculationX uses machine-driven document recognition to turn tax returns into fast, consistent income calculations in minutes with no manual review. It handles complex borrower scenarios, flags missing documentation early, and integrates with Fannie Mae's income calculator to accelerate file completion, all while keeping data secure on U.S.-based servers.

Income CalculationX:

- ✓ Moves you from manual processes to a more connected, data-driven workflow
- ✓ Helps you act on verified insights earlier
- ✓ Strengthens pre-approvals and reduces fallout
- ✓ Auto-populates tax data
- ✓ Delivers the right data at the right time

Measurable Business Benefits

Speed & Efficiency

Income CalculationX cuts self-employed income calculation from six hours to fifteen minutes. Loan officers can qualify consumers on the spot before a credit report is ever pulled.

Accuracy & Confidence

Every calculation runs the same way, every time. Structured, consistent output eliminates variability between loan officers and gives underwriters files they can trust from the start.

Productivity Gains

Free up hours per file across your entire team. Reduce rework, minimize late-stage underwriting friction, and scale your self-employed book without adding headcount.
